SQUASH PARTY

WHY ACT?

Many places to which you travel probably have other kids your age traveling there, too. If fewer vehicles were used to get kids from one place to another, think of the fossil fuels, clean air, road use, and time that would be saved! This is also a great opportunity for you to “show off” your new friends to your parent(s). If you don’t know many kids where you’re going, this Earth Action is a great way to make new friends while you reduce air pollution and global warming.

RESOURCE SAVINGS

You reduce car mileage, gas money, air pollution, and road use. You make your parent(s) happy because they have more time to do other things. You also reduce global warming.

EARTH ACTION

- When you are at the next activity where you meet other kids, find out who lives near you and swap phone numbers.
- Give the phone numbers to your parent(s) so that they can set up a car pool.
- Think of all the places you go to where you can have a “squash party” to get there.

MATERIALS

- New or old friends, and a car.

TIME

- When it’s your parent(s)’ turn to drive, just a few extra minutes to pick up and drop off friends.
