Center for Reinventing the Planet

IMPACT REPORT

The Greatest Good

What is the greatest good I can do? This question becomes exponential when my greatest good aligns with the greatest good possible.

What's the greatest good possible on planet Earth now?

Would it be a solution to climate change?

Would it be Peace on Earth?

Would it be lifting the developing world representing 80% of humanity out of poverty?

Would it be empowering humanity with the knowledge to accelerate its evolution?

Would it be liberating the planet's financial resources to do all of this and much more?

The answer is yes...

We need a solution that effectively answers these five questions.

What is the best way to find such a solution? Create the most efficient way to get the maximum outcome possible.

A master plan is required to do this.

Based on the principles of agency, abundance, alchemy, and audacity.

Empowered by social transformation master codes.

Embedded in an empowerment framework that allows everyone to shine.

That facilitates the full potential of everyone who wishes to contribute to the realization of a better world.

That activates the puzzle piece each person on the planet has been seeded with when the divine master plan was created.

Forty years in the making, such a plan exists – it's called "Reinventing the Planet."

The Plan

Five levers to reinvent the planet.

**Climate
Development
Peace
Knowledge
Money**

Climate

Goal: Accelerate the decarbonization of the world's cities which emit 70% of the planet's CO₂ through empowering its citizens – 70% of a city's carbon footprint – using the Cool Block and Cool Neighborhood Programs.

**20 Billion Pounds
CO2 Reduction**

31%

Average CO2 reduction per household

75M+

Actions Taken

10,000

Average pounds reduced per household

25
